30%	Percentage who used primary sources
3/4	Proportion of students who felt an A level course prepared them fairly well for college
86%	Percentage who thought teachers were more influential than their own reading/thinking in developing as historians

Exercise 2 Answers:

- 1895
- Roentgen
- They travel in straight lines, they are uncharged, they are a wave motion phenomenon, and they are transverse

Exercise 3 Answers:

Type of Evidence	Date	Source	Details/features of the monster	Reliability / reasons for doubt
Biography	AD565	St. Columban Biography	Monster afraid of the Saint	Biography of a Saint
Sighting	1933-34	Alex Campbell	Long, tapered neck 6 feet small, serpentine like head	He worked at the site; but he also was a newspaper reporter who wanted a good story
Photo	1934	Kenneth Wilson	Snakelike neck and tiny head	An actual photo
Film	1960	Tim Dinsdale	Something moving in the water	Blurry and very distant
Sonar	1967	University of Birmingham	“Stirrings” were notes	Highly inconclusive
Sighting	June 1964	Clem Skelton	A hump	He had “monster fever”
Submarine	1969	Sub exploration	None	Nothing found
