

# Basic Map Skills

---

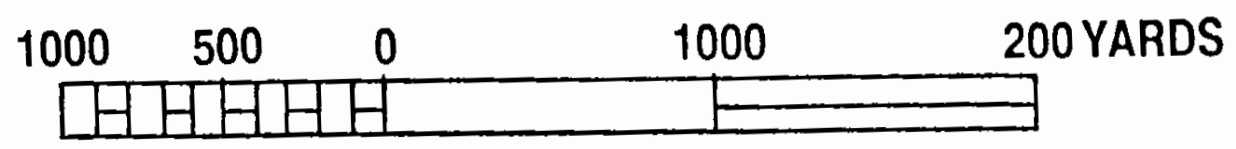

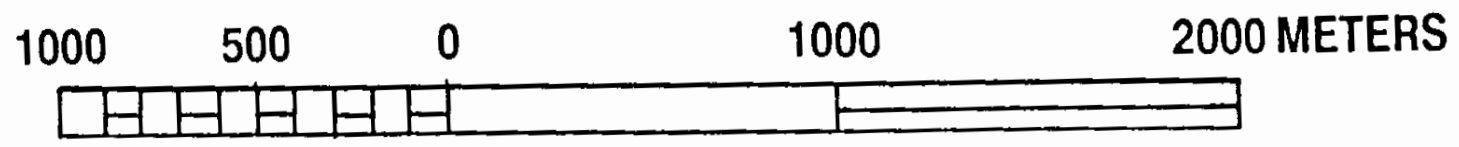

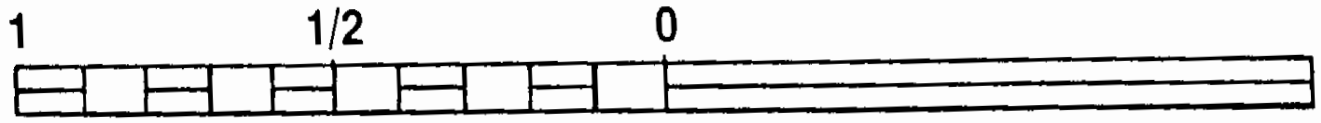

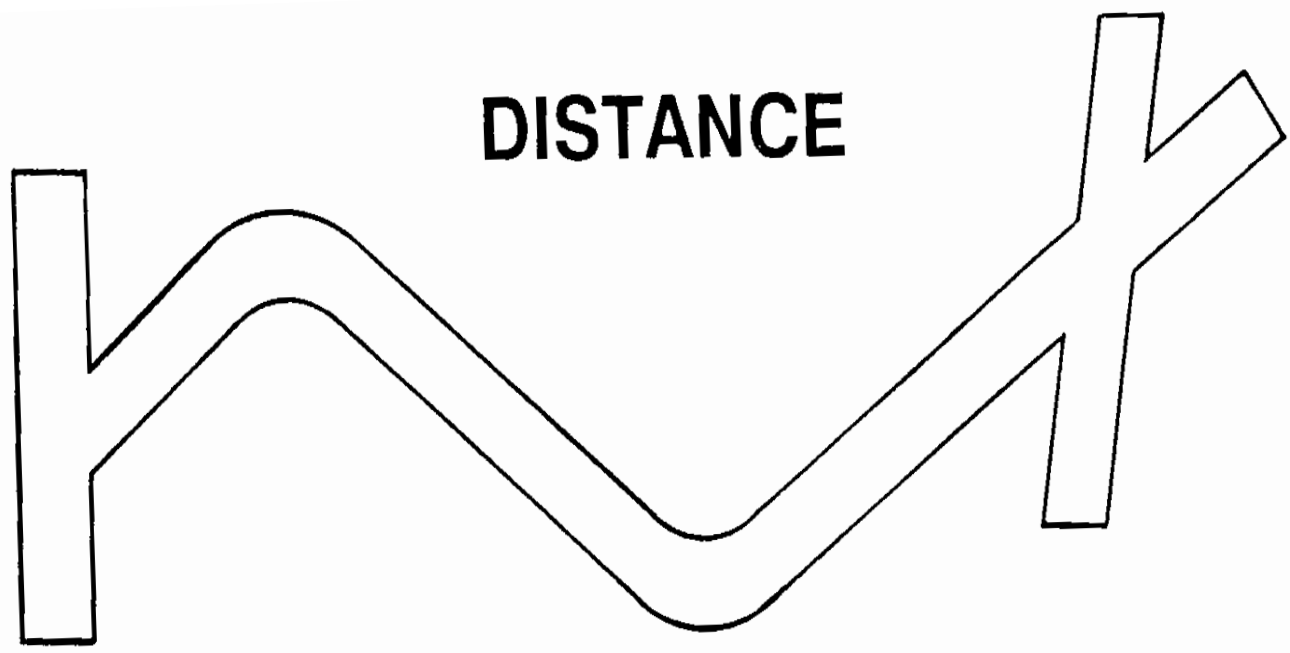

- Finding and Measuring Distance

# Determine Distance

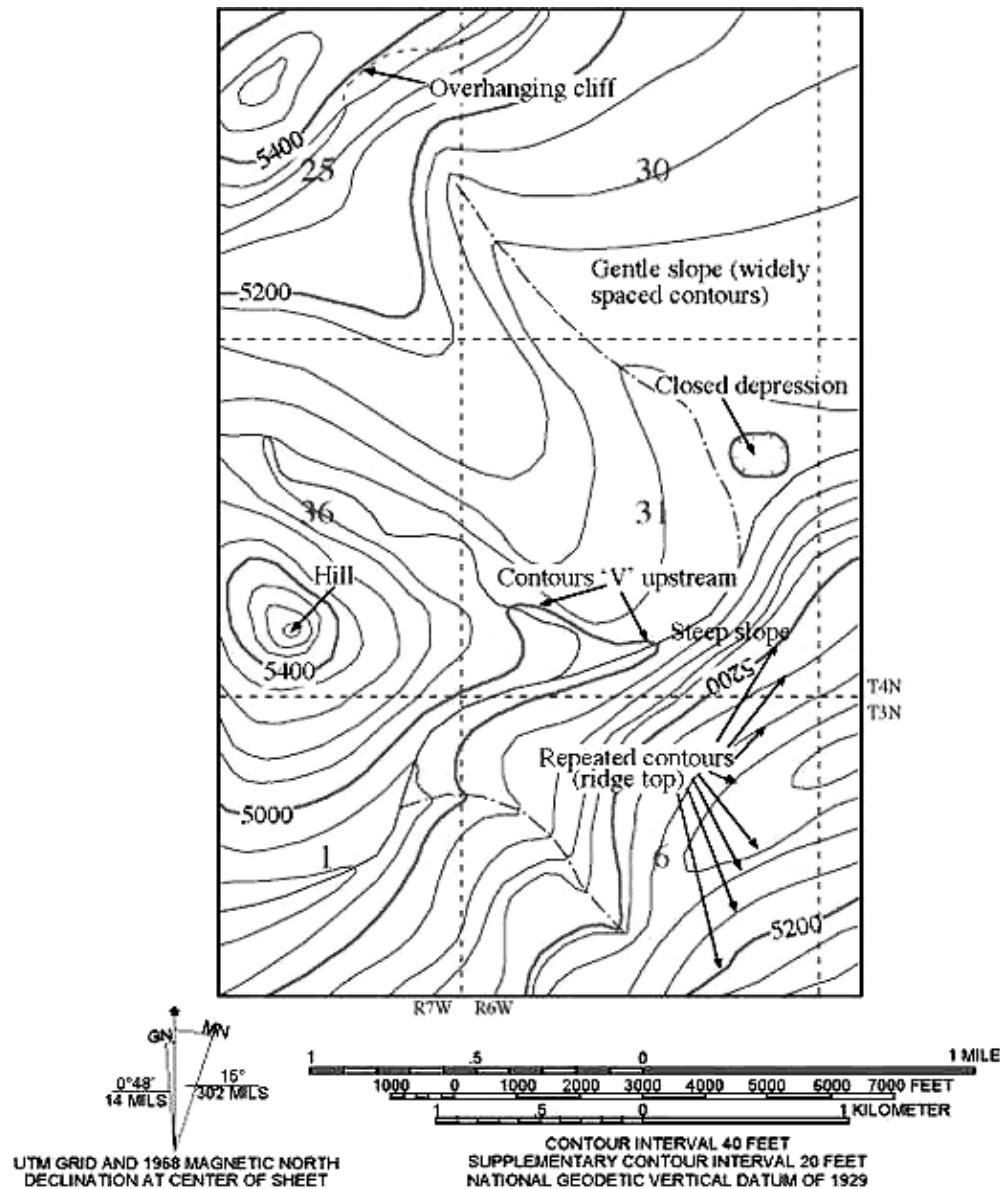

# Determine Distance

- **Straight Line**
  - Use edge of paper and mark distance between points
  - Line paper up next to scale to determine distance
- **Road Distance**
  - Break curve into series of straight lines and measure from curve to curve
  - Line paper up next to scale to determine distance

# DISTANCE

# Let's try an example

# **Determine the distances in feet AND miles between these pairs of points**

- A and B
- B and C
- C and D
- A and C
- A and D
- B and D
