Flowchart

Airway Choking Rescue Breathing

Enter

Assessment Determine Unresponsiveness → Call for Help and Position victim → Open Airway

Open Airway → Assessment Determine Breathlessness → Breathing ?

Breathing ? —Y→ Maintain Open Airway

Maintain Open Airway → Monitor → Still Breathing ?

Still Breathing ? —N→ Begin Rescue Breathing

Still Breathing ? —Y→ Traisport to Emergency Care Unit

Breathing ? —N→ Begin Rescue Breathing

Begin Rescue Breathing → Air Entering ?

Air Entering ? —Y→ Breathe 2 Times

Air Entering ? —N→ Reposition Head Reattempt Ventilation

Reposition Head Reattempt Ventilation → Breathe 2 Times

Breathe 2 Times → Assessment Determine Pulselessness Active EMS

Reposition Head Reattempt Ventilation → Air Entering ?

Air Entering ? —Y→ Breathe 2 Times

Air Entering ? —N→ Abdominal Thrusts (heimlich maneuver) Finger Sweep Breathe

Abdominal Thrusts (heimlich maneuver) Finger Sweep Breathe → Air Entering ?

Air Entering ? —Y→ Breathe 2 Times

Air Entering ? —N→ Abdominal Thrusts (heimlich maneuver) Finger Sweep Breathe

Abdominal Thrusts (heimlich maneuver) Finger Sweep Breathe → Traisport to Emergency Care Unit

Assessment Determine Pulselessness Active EMS → Pulse Present ?

Pulse Present ? —N→ Chest Compressions and Rescue Breathing 15:2 Ratio

Pulse Present ? —Y→ Continue Rescue Breathing every 5 Seconds - Adults Monitor Pulse

Chest Compressions and Rescue Breathing 15:2 Ratio → Pulse/Breathing Check after 4 Cycles then every Few Minutes

Pulse/Breathing Check after 4 Cycles then every Few Minutes → Traisport to Emergency Care Unit

Continue Rescue Breathing every 5 Seconds - Adults Monitor Pulse → Pulse Present ?

Pulse Present ? —N→ Chest Compressions and Rescue Breathing 15:2 Ratio

Pulse Present ? —Y→ Traisport to Emergency Care Unit
