

Cadet Lesson Planning

Five Steps

1. What do you want the cadets to know and be able to do at the end of the class?
2. What will you do to assess whether they have learned the material?
3. What steps will you take to present the material to them and allow them to practice?
4. What materials will you need to teach the class?
5. How did the class go? How would you improve upon it the next time?
