Cadet Lesson Planning

Five Steps

- 1. What do you want the cadets to know and be able to do at the end of the class?
- 2. What will you do to assess whether they have learned the material?
- 3. What steps will you take to present the material to them and allow them to practice?
- 4. What materials will you need to teach the class?
- 5. How did the class go? How would you improve upon it the next time?
