Color Code the Victims

METTAG
Color Code the Victims

Delayed

Green

Lowest priotity - patients can wait for treatment until all others have been moved from scene.

Secondary

Yellow

Patients that need to go to hospital, but not immediately

Immediatae

Red

Critically-injured patients with treatble life-threatenings injuries. Will be transported from the scene first

Deceased

Black

Dead or unsalvageable patients.

Triage

A process for sorting injured people into groups based on their need for or likely benefit from immediate medical treatment.

Triage is used in hospital emergency rooms, on battlefields, and at disaster sites when limited medical resources must be allocated.
